Filing an Assignment of Authorization or a Transfer of Control in Batch

This document explains how to file a Transfer of Control and an Assignment of Authorization with or without partitioning and/or disaggregation. At this time, ULS batch filing does not support filing a "partial" site-based Assignment of Authorization.

When filing a Transfer of Control, the record types that are required are HD, AD, EN, CF.

When filing an Assignment of Authorization without partitioning or disaggregation, or a non-partial assignment [i.e., a "full" assignment], the record types required are HD, AD, EN, TA, CF.

When filing an Assignment of Authorization with partitioning for defined areas, the record types required are HD, AD, EN, TA, CF, MK, MP.

When filing an Assignment of Authorization with partitioning for undefined areas, the record types required are HD, AD, EN, TA, CF, MK, MP, MC.

When filing an Assignment of Authorization with disaggregation, the record types required are HD, AD, EN, TA, CF, MK, MF.

When filing an Assignment of Authorization with partitioning and disaggregation for defined areas, the record types required are HD, AD, EN, TA, CF, MK, MP, MF.

When filing an Assignment of Authorization with partitioning and disaggregation for undefined areas, the record types required are HD, AD, EN, TA, CF, MK, MP, MC, MF.

When filing an amendment to an Assignment of Authorization to cancel part of
The record types must be in the order indicated.

Amending an Assignment of Authorization or Transfer of Control in Batch

To file an amendment for a Transfer of Control or an Assignment of Authorization which does not include partitioning or disaggregation, simply file a CF record with the call sign and the action of "A" or "D."

To amend a partitioned or disaggregated Assignment of Authorization to add a call sign, partitions or disaggregation, file the same way you do for an Assignment of Authorization. The valid records are CF, MK, MP, MC and MF.

To amend a partitioned or disaggregated Assignment of Authorization to delete a call sign, file a CF record with the call sign and an action of "D"; all partitions and disaggregations belonging to that call sign will automatically be deleted. Do not file MK, MP, MC, MF.

If you want to delete a defined or undefined partition, file an MP record with the undefined sequence number or defined area name. Do not file an MC or MF records.

If you want to delete a set of coordinates, file an MC with the sequence number, the coordinates, and the action of "D."

	Record Type HD
