

The National Environmental Policy Act of 1969 (NEPA) established a national policy to protect the environment by requiring consideration of the environmental effects of major federal actions.

Today's scoping meeting, conducted under NEPA authority, gives the public an opportunity to provide input toward the development of the Programmatic Environmental Assessment that the Federal Communications Commission is preparing for its Antenna Structure Registration program.

Today you will learn more about the Antenna Structure Registration program and what the FCC is doing to evaluate its potential impacts on the human environment, including migratory birds, and threatened and endangered species.

Agenda — Washington, DC

Table with 2 columns: Activity and Time. Activities include Open house, Opening remarks, Presentation, Question & Answer session, Verbal comments, and Wrap-up.

Discussion Guidelines

- Please be courteous to others during the question and answer, and comment sessions
