(c) Section 101.105(c)(3), as amended, is revised to replace “For site-based multiple address stations in * * * .” with “For site-based multiple address stations in the 928-929/952-960 MHz and the 932-932.5/941-941.5 MHz bands, * * * .”

(d) Section 101.105(c)(5) is revised by deleting the current language and replacing it with “Mobile operation is permitted on any of the MAS frequency bands on a primary basis.”

(e) Note 1 in Section 101.109(c) is revised to read as follows: “ * * * If contiguous channels are aggregated in the 928-928.85/952-952.85/956.25-956.45 MHz, the 928.85-929/959.85-960 MHz, or the 932-932.5/941-941.5 MHz bands, then the bandwidth may exceed that which is listed in the table.”

(f) Section 101.135 is revised to read as follows: “ * * * (e) Applicants licensed in
the MAS frequencies after [insert 60 days after date of publication in the Federal Register], shall not provide service to others on a non-profit, cost-shared basis or on a for-profit private carrier basis in the 928-928.85/952-952.85/956.25-956.45 MHz bands and the 932.25625-932.49375/941.25625-941.49375 MHz bands.”

(g) Section 101.147(a) as amended, is revised to read as follows:

§ 101.147 Frequency assignments.

928.0 - 929.0 MHz /28/
932.0 - 932.5 MHz /27/
932.5 - 935 MHz /17/

(h) Section 101.147(b), as amended, is revised to read “Frequencies normally available for assignment in this service are set forth with applicable limitations in the following tables: 928-960 MHz Multiple address system (MAS) frequencies are available for the point-to-multipoint and point-to-point transmission of a licensee’s products or services, excluding video entertainment material, to a licensee’s customer or for its own internal communications. The paired frequencies listed in this section are used for two-way communications between a master station and remote stations. Ancillary one-way communications on paired frequencies are permitted on a case-by-case basis. Ancillary communications between interrelated master stations are permitted on a secondary basis. The normal channel bandwidth assigned will be 12.5 kHz. EA licensees, however, may combine contiguous channels without limit or justification. Site-based licensees may combine contiguous channels up to 50 kHz, and more than 50 kHz only upon a showing of adequate justification. When licensed for a larger bandwidth, the system still is required to use equipment that meets the ± 0.00015 percent tolerance requirement. (See § 101.107). Any bandwidth (12.5 kHz, 25 kHz or greater) authorized in accordance with this section may be subdivided into narrower bandwidths to create additional (or sub) frequencies without the need to specify each discreet frequency within the specific bandwidth. Equipment that is used to create additional frequencies by narrowing bandwidth (whether authorized for a 12.5 kHz, 25 kHz or greater bandwidth) will be required to meet, at a minimum, the ± 0.00015 percent tolerance requirement so that all subfrequencies will be within the emission mask. Systems licensed for frequencies in these MAS bands prior to August 1, 1975, may continue to operate as authorized until June 11, 1996, at which time they must comply with current MAS operations based on the 12.5 kHz channelization set forth in this paragraph. Systems licensed between August 1, 1975, and January 1, 1981, inclusive, are required to comply with the grandfathered 25 kHz standard bandwidth and channelization requirements set forth in this paragraph. Systems originally licensed after January 1, 1981, and on or before May 11, 1988, with bandwidths of 25 kHz and above, will be grandfathered indefinitely.”

(i) Section 101.147(b)(4) as amended, is revised by deleting the current language and replacing it with “Frequencies listed in this paragraph are licensed by either economic area or on a site-
Section 101.147, Note 27, as amended, the first sentence is revised to replace “Frequencies in the 932 to 932.5 MHz and 941 to 941.5 MHz bands are shared with Government fixed point-to-multipoint stations and point-to-multipoint stations in the Public Land Mobile Service.” with “Frequencies in the 932 to 932.5 MHz and 941 to 941.5 MHz bands are shared with Government fixed point-to-multipoint stations.”

Section 101.147, Note 28, as amended, the first sentence is revised to replace “Subsequent to July 1, 1999, incumbent MAS operations, as defined in § 101.1331(a), in the 928/952/956 MHz bands are reserved for private internal use.” with “Subsequent to July 1, 1999, MAS operations, as defined in § 101.1331(a), in the 928/952/956 MHz bands are reserved for private internal use.”

Section 101.1305 is revised to read “A private internal service is a service where entities utilize frequencies purely for internal business purposes or public safety communications and not on a for-hire or for-profit basis.”
