RE: Petition to remove LPTV application BNPTT-20000825AJF
FI 129423, Yuma, CO from Auction 81, Group MX060

Ladies and Gentlemen:

The subject application is listed in group MX 60 because of a presumed conflict with Roger Harders' application BNPTTL - 20000829AML, North Platte, NE, (herein Harders)

In the August 2001 Settlement Window Harders added an Engineering Statement reporting that a Longley-Rice Terrain Dependent analysis in accordance with OET Bulletin 69 showed that there is no predicted interference from Harders to our application.

Further the outgoing interference contour (29dBu) of our application does not intrude on Harders.

Thus Harders and our BNPTT-20000825AJF are not mutually exclusive.

Please reclassify my application as a "singleton".

Respectfully submitted,

Region 1 Translator Association

John F. Rietz
Engineering Manager

Footnote:

Application BNPTTL-20000829AML, Exhibit 6, "New. A, Yuma, CO BNPTTL20000825AJF, TV Incoming Interference Study", BNPTTL-20000829AML is included in the list of stations which do not cause interference. (Posted on CDBS record for Harders)
