RE: Petition to remove LPTV application BNPTTL-20000831BHB from Auction 81, Group MX046

Ladies and Gentlemen:

As explained in the attached “Engineering Statement” the subject application was amended during the August 2001 settlement window to clear the conflicts with the other applications in this group.

I believe it is not necessary for my application to be in the auction as there is neither an incoming or outgoing conflict.

Please reclassify my application as a “singleton”.

Respectfully submitted

Applicant
ENGINEERING STATEMENT IN SUPPORT OF THE
PETITION OF ROBERT RAYNOLDS TO BE REMOVED
FROM AUCTION 81, GROUP MX046

Introduction

Application BNPTTL-20000831BHB has been included in MX046 in spite of the unilateral engineering changes filed in a settlement window to clear the conflicts with the other applications in this group.

Outgoing Interference:
The offset was changed in the August 2001 settlement window to eliminate the interference to the other applications. This change of offset is reflected when viewed in the CDBS.

Incoming Interference:
The application contains a statement added in the August 2001 settlement window to the effect that the applicant will accept interference from the other applicants in this group. This statement appears when this application is viewed on CDBS. A copy of the page with this statement as it appears in CDBS is attached. See paragraph #4, Conclusion.

Discussion

The applicant by unilateral changes and additions to the application during a settlement window has cleared both outgoing and incoming conflicts. Thus it should not be in an auction with the other applicants in MX046.

Respectfully submitted,

THERE ARE ONE OR MORE OVERLAPPING PROTECTED V. INTERFERING CONTOURS

ANALYSIS OF POTENTIAL INTERFERENCE WHICH INCLUDES A LONGLEY-RICE STUDY IN
ACCORDANCE WITH OET BULLETIN 69 OF THE ACTUAL PREDICTED INTERFERENCE,
INCOMING AND OUTGOING, BETWEEN THIS APPLICATION AND THE IDENTIFIED

SHOWN BELOW.

3. ANALYSIS
