RE: Petition to remove LPTV application BNPTTL-20000831CBW from Auction 81, Group MX239

Ladies and Gentlemen:

As explained in the attached “Engineering Statement” the subject application was amended during the August 2001 settlement window to clear the conflicts with the other applications in this group.

I believe it is not necessary for my application to be in the auction as there is neither an incoming or outgoing conflict.

Please reclassify my application as a “singleton”.

Respectfully submitted

s/s William Germano
Applicant
ENGINEERING STATEMENT IN SUPPORT OF THE
PETITION OF WILLIAM GERMANO TO BE REMOVED
FROM AUCTION 81, GROUP MX239

Introduction

Application BNPTTL-20000831CBW has been included in MX239 in spite of the unilateral engineering changes filed in a settlement window to clear the conflicts with the other applications in this group.

Outgoing Interference:
An amendment was filed to change its offset, thus clearing the interference contour overlap. A copy of the page with this statement as it appears in CDBS is attached. See paragraph #2, Discussion.

Incoming Interference:
The application contains a statement added in the August 2001 settlement window to the effect that the applicant will accept interference from the other applicants in this group. This statement appears when this application is viewed on CDBS. See paragraph #4, Conclusion.

Discussion

The applicant by unilateral changes and additions to the application during a settlement window has cleared both outgoing and incoming conflicts. Thus it should not be in an auction with the other applicants in MX239.

Respectfully submitted,

B. W. St. Clair
Engineering Consultant
