## Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets with the Wi-Fi air interface have clear and effective disclosure that the handset has not been tested for hearing aid compatibility with respect to its Wi-Fi voice operation? No

Explain: Denali does not offer handsets with the Wi-Fi air interface.

## Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: <http://www.mycricket.com/features-and-downloads/phone-compatibility>

Explain:

## Consumer Outreach

Describe consumer outreach efforts in the past 12 months: In addition to providing information on the website listed on this form, Denali makes its sales personnel aware of the Commission's hearing aid compatibility requirements, as well as the compatible handsets Denali offers. Denali makes its compatible handsets available to customers for testing in Denali's retail stores, as required by Section 20.19(c)(4)(i) of the Commission's rules.

## Methodology for Functionality Levels

Denali offers handsets with a wide range of features and capabilities, and at varying price points. Because Denali is a Tier III carrier, however, the number of handsets that Denali offers is not large enough to justify marketing its handsets based on levels of functionality. For example, Denali does not currently offer handsets with Wi-Fi capability, nor does it carry a wide range of PDAs or Smartphones. Denali's hearing aid-compatible handsets cover a broad range of prices and functions, including multiple frequency bands, text messaging and data capabilities, as well as other features that may be desirable to customers with hearing disabilities or impairments. For purposes of this filing, Denali classifies its handset models into three categories:

GOOD: includes basic calling and texting functions, mobile web access, GPS;

BETTER: may also include camera phone, Bluetooth, mobile e-mail, QWERTY keypad, and multimedia messaging service;

BEST: may also include touchscreen, high-speed data, and video.
