

Federal Communications Commission

Hearing Aid Compatibility Status Report (FCC Form 655)

Reporting Period: January 1, 2009 - December 31, 2009
Filing Deadline: January 15, 2010

Filing Confirmation Number: 0004093035
FRN: 0006945950

General Report Information

Type of Company

Service Provider

De Minimis Exception

Did you offer more than two handsets over any air interface to service providers (if you are a device manufacturer) or to subscribers (if you are a service provider) during this reporting period? Yes

Did you offer any handsets to service providers (if you are a device manufacturer) or to subscribers (if you are a service provider) during this reporting period?

Company Information

Company Name: T-Mobile USA
PO Box:
Street Address: 401 Ninth Street, NW, Ste 550
City: Washington
State: DC
Zip Code: 20004

Contact Name: Harold Salters; Shellie Blakeney
Contact Phone: (202) 654-5900
Contact Fax:
Contact Email: Harold.Salters@T-Mobile.com

Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets with the Wi-Fi air interface have clear and effective disclosure that the handset has not been tested for hearing aid compatibility with respect to its Wi-Fi voice operation? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address:

http://www.t-mobile.com/Company/Community.aspx?tp=Abt_Tab_Safety&tsp=Abt_Sub_TTYPolicy

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: T-Mobile continues to enhance measures in providing consumers current information about its HAC compliant products. T-Mobile's HAC compliant handset boxes are properly labeled. In addition, T-Mobile places HAC M-rating, and where appropriate, T-rating information on its price/feature ("call-out") cards, which are located with the handset displays in T-Mobile owned and operated retail stores. HAC product information is available on T-Mobile's public website, which is referenced within this Status Report. Furthermore, T-Mobile offers a "voice barred/ data only" plan for certain devices, which is attractive to customers who are deaf or hard of hearing.

T-Mobile continues to embrace opportunities to talk about its HAC offerings, as well as, other products and services that are designed to promote accessibility, to broad audiences by participating on panels at conferences attended by organizations representing persons with hearing loss and members of such organizations. In these discussions, T-Mobile continues to stress the importance for consumers to try/test HAC handsets prior to purchase. T-Mobile makes HAC handsets available for consumers to test at retail stores that are owned and operated by the company.

Moreover, T-Mobile's Customer Care and Retail representatives stand ready to lend assistance to consumers with questions on HAC products.

Methodology for Functionality Levels

All of T-Mobile's HAC devices are enabled to function on commercial mobile wireless frequency bands outside the United States.

HAC devices in the "Good" category include basic bar to core feature handsets. These handsets may not be enabled to perform advanced applications. Although many of these handsets are quad-band that operate over four frequency bands (1900 MHz, 1800 MHz, 900 MHz, 850 MHz), some HAC devices under this category are tri-band, operating over only three frequency bands (1900 MHz, 1800 MHz, 850 MHz).

HAC handsets categorized as "Best" can be characterized as mid-range and typically include products that have distinctive color, form factor and style. The Best category includes quad-band devices, devices that are 3G enabled, as well as, those that are capable of operating in Wi-Fi mode.

HAC devices that fall in the "Premium" category are high-end devices, which are distinguishable in terms of design and materials. These devices typically contain advanced features and applications. HAC devices in the Premium category are quad-band. Several of these HAC devices also have either 3G capability or are Wi-Fi enabled.
