## Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Potential customers are advised of the availability and functionality of Hearing Aid Compliant (HAC) handset models through in-store discussion as needed or requested and through information found on our website.

## Methodology for Functionality Levels

Determination of a handset's level of functionality was based on the cost of the unit, the features offered, and the operating capabilities of the unit. Thumb Cellular has identified the following four (4) levels of handset functionality:

1. Low Tier: includes handsets with a retail value of \$129 or less that have basic features, but do not offer a camera and may only have limited data functions.
2. Mid Tier: includes handsets with a retail value of \$139 up to \$219 that include all the basic features and, in addition, offer a camera and bluetooth technology. All models in this category offer a full range of data functions. Some models may also offer an expansion memory slot and music player capabilities.
3. High Tier: includes handsets with a retail value of \$239 up to \$399 that include all the basic features, offer a camera and bluetooth technology, and an expansion memory slot and music player capabilities. All models in this category offer a full range of data functions. In addition, some models may also offer a few on-screen, quick-access keys.
4. Smart Phones: includes handsets with a retail value greater than \$400 that include all the functions offered in the previous three (3) categories and also have the functionality of a PDA.
