### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: <http://www.midrivers.com/hearing-aid-compatibility/>

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Mid-Rivers Wireless hearing aid compatibility information sheet is available at each retail outlet and is reviewed regularly to ensure continuing accuracy. Mid-Rivers Wireless continues the practice of including HAC fliers in customer invoices periodically, and maintains signs in each retail location encouraging customers and prospective customers to ask a sales representative about HAC issues. Information regarding hearing aid compatibility is also available on the Company's web site.

### Methodology for Functionality Levels

C&CC assigns each compliant handset a level of functionality based upon the company's assessment of two factors: price and operating features. Lower priced handsets with fundamental capabilities are defined as "Basic". More advanced functions or functionality, such as availability of a better quality camera or enhanced memory, together with a higher price, results in classifying a handset as "Intermediate". More expensive phones with the availability of Wireless Internet or Wi-Fi capability or an operations system that supports advanced applications are classified as "Advanced".
