Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? No

Website address:

Explain: The company has no public website for this system. It uses only a very small number of direct employees to market its push-to-talk service to business and public safety users. It does not sell service to the consumer market.

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: The company does not market its service to consumers, only to business and public safety users and only as a push-to-talk dispatch offering. Nonetheless, the company has instructed its sales staff about the availability of its HAC-compliant handsets and advises prospective customers in its marketing presentations accordingly.

Methodology for Functionality Levels

Three levels of functionality have been established. They are based on retail price, as follows: 1 = Retail \$100 and under 2 = Retail \$299 and under 3 = Retail \$300 and above

Report Remarks

This Report remains substantially the same as the previous year because this service offering is a small portion of the Company's business, and is only offered to a limited number of business and public safety users. As a result, there is little to no change from year to year.
