

Federal Communications Commission

Hearing Aid Compatibility Status Report (FCC Form 655)

Reporting Period: January 1, 2011 - December 31, 2011

Filing Confirmation Number: 0005032270

Filing Deadline: January 17, 2012

FRN: 0006945950

Filing Date: 01/17/2012 12:49 PM

General Report Information

Type of Company

Service Provider

De Minimis Exception

Did you offer more than two handsets over any air interface to service providers (if you are a device manufacturer) or to subscribers (if you are a service provider) during this reporting period? Yes

Did you offer any handsets to service providers (if you are a device manufacturer) or to subscribers (if you are a service provider) during this reporting period?

Company Information

Company Name: T-Mobile USA, Inc.
Brand Names: T-Mobile
PO Box:
Street Address: 12920 SE 38th Street
City: Bellevue
State: WA
Zip Code: 98006

Contact Name: Michael Palmer
Contact Phone: (425) 383-5558
Contact Fax:
Contact Email: Michael.Palmer@T-Mobile.com

Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those

models, and an explanation of the rating system? Yes

Website address:

http://www.t-mobile.com/Company/CompanyInfo.aspx?tp=Abt_Tab_ConsumerInfo&tsp=Abt_Sub_AccessibilityPolicy

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: T-Mobile provides tools to inform consumers about current information on its HAC product offerings. T-Mobile's HAC compliant handset boxes are labeled. In addition, T-Mobile places the HAC M-rating, and where required, T-rating information on its price/feature cards, which are located with the handset displays in T-Mobile owned and operated retail stores. HAC product information is available on T-Mobile's public webpage, which is referenced within this Status Report.

T-Mobile embraces opportunities to talk about its HAC offerings, as well as other products and services that are designed to promote accessibility, to broad audiences by participating in conferences and seminars attended by organizations representing persons with hearing loss and members of such organizations. As an example, T-Mobile exhibited and participated at the Hearing Loss Association of America's annual national convention in Arlington, Virginia in June 2011. T-Mobile also exhibited in May 2011 at the Celebrate Communications Event in Fairfax, Virginia, conducted by the Northern Virginia Resource Center for Deaf and Hard of Hearing Persons. In many of the discussions that take place at these gatherings, T-Mobile continues to stress the importance for consumers to try/test HAC handsets prior to purchase. Furthermore, T-Mobile offers a "voice-barred/data-only" plan for certain devices, which is attractive to customers with profound hearing loss.

Methodology for Functionality Levels

Good Category

HAC devices in the "Good" category cover the range from basic bar devices to core feature handsets. Although many of these handsets are quad-band that operate over four GSM frequency bands (1900 MHz, 1800 MHz, 900 MHz, 850 MHz), some HAC devices that fall within this category operate over fewer than these four frequency bands and we note some even operate at WCDMA bands (1700 MHz, 2100 MHz).

Best /Premium Category

HAC devices categorized in the "Best/Premium" category include quad-band GSM/WCDMA devices, most of which are high-speed enabled. These devices feature higher-end design, material and finish, paired-up with a more sophisticated user interface and functionality. Typically, such devices contain advanced features and applications.

Report Remarks

The Commission has indicated that service providers are expected to verify handset model-specific HAC information through one of three methods: "from the manufacturer's previous reports to the Commission, from the manufacturer's own website, or from the manufacturer directly." See Amendment of the Commission's Rules Governing Hearing Aid-Compatible Mobile Handsets; Petition of American National Standards Institute; Accredited Standards Committee C63 (EMC) ANSI ASC C63®, First Report and Order, 23 FCC Rcd 3406, 3445-56 ¶ 98 (2008) ("2008 Order"). In preparing its 2012 HAC Report, T-Mobile encountered instances where for certain handsets there were slight differences between the HAC rating information on the FCC's equipment authorization search website and the information reflected in the confirming documentation T-Mobile received from an OEM/manufacture (upon which T-Mobile is allowed to rely) and/or from the manufacturer's previous reports to the Commission. As part of its due diligence efforts, T-Mobile investigated such discrepancies and in those instances has included an explanation in the "Remarks" sections of applicable handsets throughout the Report.

You have reported the following handset model summary information.

Total number of handsets offered: 55

Air Interface	Fully Hearing Aid Compatible		Acoustic Coupling Compatible Only		Non-Compliant Handsets		Total by Air Interface
	Number	Percent	Number	Percent	Number	Percent	
GSM	30	55%	9	16%	16	29%	55
WCDMA	23	51%	8	18%	14	31%	45

Ratings

M-Rating:

T-Rating:

Functionality Level

Best/Premium

Remarks

The initial equipment authorization included no HAC rating, but M3/T3 rating was added by Class II permissive change and implemented through a software update. Since T-Mobile cannot be sure that all handsets received the update, out of an abundance of caution, the device currently is listed by T-Mobile as non-compliant.

Remarks

Consistent with FCC 08-68 ¶ 98, T-Mobile relied upon the manufacturer's direct report to it or the manufacturer's report to the FCC. The most recent Class II Permissive Change indicated only a M3 rating, although the WTB report indicated M3/T3.
