### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: <http://www.appalachianwireless.com/?page=phones&item=hacinfo>

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Appalachian Wireless' compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company's web site, and its retail salespeople are trained to assist with complaint digital wireless phones. Written materials, pamphlets and other promotional literature are provided at the point of sale and on the website, addressing the needs of individuals with hearing disabilities. Consumers are given a 30-day trial period within which to try out digital wireless phones to determine whether they will work properly with their hearing aids.

### Methodology for Functionality Levels

Appalachian Wireless' mobile units are categorized by price per unit, not discounted for a service contract. High End Phones (\$300+) generally have advanced features such as a camera, Bluetooth, and Internet access capability. Mid-Tier Phones (\$150-\$299) may have a camera, Bluetooth, and Internet access capability, but are older or less stylish. Low End Phones (Less than \$150) may or may not have a camera, Bluetooth, and Internet access capability, and generally are heavier and lack such features MP3 players and expandable memory.

### Report Remarks

Appalachian Wireless does not operate network facilities utilizing a GSM or WCDMA air interface.
