Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: www.cellcom.com/resources/media/documents/hearing_aid_compatibility_chart.pdf

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: New-Cell maintains a public website displaying its entire selection of handset and devices, including those that are HAC-compliant. Sales staff is trained to assist existing and prospective customers in identifying HAC-compatible handsets and devices. Existing or prospective customers can typically find whether a handset or device is HAC-compliant by either checking the packaging containing the handset/device, or by consulting the packaging insert or operations manual. For more information on HAC, existing and prospective customers can be directed to www.accesswireless.org/Disability-Categories/Hearing.aspx and other public websites dedicated to HAC education.

Methodology for Functionality Levels

New-Cell offers HAC-compatible handsets and devices in all major price categories, including low-cost and feature (“C” level) (generally <\$100), moderate-cost and features (“B” level) (generally \$100-\$250), and high-end/feature-rich (“A” level) (generally >\$250). Costs generally correlate with the number of features, but, if through experience, New-Cell finds that a certain handset contains features that work well with hearing aids, such as volume control, it will be labeled accordingly at the “high-end/feature-rich” or “A” level for functionality. Sales staff is trained to assist all existing and prospective customers looking for a HAC-compliant device/handset. HAC-compatible handsets and devices vary in their inherent “levels of functionality,” but typically at least one (1) HAC-compliant handset/device with features and services typical of its price category can be found that meets each customer’s price range.
