Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those

models, and an explanation of the rating system? Yes

Website address: WWW.INDIGOWIRELESS.COM

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Americell uses it's website and billing message for outreach efforts with regard to hearing aid compatibility. There are also posters in the stores and all phones on display have a hearing aid rating sign. All customer service representatives are trained to advise customers on which hearing aid compatible products meet their needs and budget.

Methodology for Functionality Levels

Americell offers handsets across different levels of functionality. Indigo Wireless defines levels of functionality according to features and characteristics of the handsets. We offer a choice of inexpensive phones that are basic or low level, medium level that have more features and priced accordingly, and high level phones that are very feature rich and they are the most expensive. We offer all levels of phones that are HAC. Indigo Wireless has been able to maintain the required ratio of HAC phone choices despite the model phase out, limited vendor choice and pricing based on our small purchase volume. The phones are rated based on extensive research of each phones specs provided by the manufacture.

Report Remarks

For the last 5 years we have not had any customers request a hearing aid compliant phone. It is very difficult to navigate the FCC website to find the HAC ratings for handsets. There are many handsets that the manufactures websites state that the handsets are HAC however, nothing comes up when you search for them on the FCC website using the FCC ID. It would be helpful to add a radio button for the functionality levels.
