Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

N/A

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

N/A

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address:

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company regarding which digital wireless phones are compliant. Compliant handsets are available for testing from live phone displays in retail locations. Written materials, pamphlets and other promotional literature are provided at the point of sale and on the website, addressing

the needs of individuals with hearing disabilities. Additional technical and anecdotal information is made available in the form of handouts from vendors that are distributed at retail centers and in communications with the hearing disabilities community. Consumers are given a thirty day trial period within which to try out digital wireless phones to determine whether they will work properly with their hearing aids.

Methodology for Functionality Levels

The categories are Good, Better and Best. Handsets in the Good category offer basic wireless telephone features including, but not limited to: color displays, SMS, EMS and MMS. Handsets in the Better category may offer additional features including, but not limited to: integrated camera, i.e. VGA, Bluetooth technology, enhanced color display, internet browser, enhanced talk time and longer battery life. Handsets in the Best category may offer additional features including, but not limited to: enhanced camera, i.e. 2.0 mega pixel, video, faster internal processor, increased RAM storage capability, touch screen technology, direct push email, and Windows Office Mobile.

Report Remarks

Mohave Wireless does not operate network facilities utilizing GSM, WCDMA, AWS or LTE air interfaces.
