### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)? Yes

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation? Yes

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure? Yes

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: [www.leaco.net](http://www.leaco.net)

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Leaco maintains a public website displaying its entire selection of handsets and devices, including those that are HAC-compliant. Sales staff is trained to assist existing and prospective customers in identifying HAC compatible handsets and devices. Existing and prospective customers can typically find whether a handset or device is HAC compatible by either checking the packaging containing the handset or device, or by consulting the packaging insert or operations manual. For more information on HAC, customers are also directed to [www.accesswireless.org/Disability-Categories/Hearings.aspx](http://www.accesswireless.org/Disability-Categories/Hearings.aspx) and other public websites dedicated to HAC education.

### Methodology for Functionality Levels

Leaco offers HAC compatible handsets and devices in all major price and feature categories, including low-cost and features (C Level, generally less than \$100); moderate-cost and features (B Level, generally \$100-\$250); and

high-end feature rich (A Level, generally greater than \$250). Costs generally correlate with the number of features, but, if through experience, Leaco finds that a certain handset contains features that work well with hearing aids, such as volume control, it will be labeled accordingly at the high-end, feature rich or A Level for functionality. Sales staff is trained to assist all existing and prospective customers looking for a HAC compliant device or handset. HAC compatible handsets and devices vary in their inherent levels of functionality, but typically at least one HAC compliant handset or device with features and services typical of its price category can be found that meets each customer's price range.
