

Federal Communications Commission

Hearing Aid Compatibility Status Report (FCC Form 655)

Reporting Period: January 1, 2013 - December 31, 2013

Filing Confirmation Number: 0006101006

Filing Deadline: January 15, 2014

FRN: 0001570936

Filing Date: 01/15/2014 04:52 PM

General Report Information

Type of Company

Service Provider

De Minimis Exception

Did you offer any handsets to subscribers in the United States during the reporting period? Yes

Have you been offering handsets in the United States for at least three years prior to the end of the reporting period? Yes

Date that you began offering handsets in the United States

Are you a small entity? Yes

Were you a small entity at any time during the three years prior to the end of the reporting period?

Date that you ceased to be a small entity?

Company Information

Company Name: Arctic Slope Telephone Association Cooperative, Inc.

Brand Names: Arctic Slope Telephone Association Cooperative

PO Box:

Street Address: 4300 B Street, Suite 501

City: Anchorage

State: AK

Zip Code: 99503

Contact Name: Jens Laipenieks

Contact Phone: (907) 564-2631

Contact Fax: (907) 563-1932

Contact Email: jens@astac.net

Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? Yes

Agent Name: Bennet & Bennet, PLLC

PO Box:

Street Address: 6124 MacArthur Boulevard

City: Bethesda

State: MD

Contact Name: Kenneth C. Johnson
Contact Phone: (202) 371-1500
Contact Fax: (202) 371-1558
Contact Email: kjohnson@bennetlaw.com

Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)? Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation? Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: <http://www.astac.net/servlet/content/hac.html>

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: ASTAC uses its website for outreach efforts with regard to hearing aid compatibility. All sales staff are trained to assist customers in identifying hearing aid compatible products that best meet the customer's needs and budget. ASTAC also has an Inupiaq speaking service representative to meet the unique communication needs of our Inupiat Eskimo membership. ASTAC maintains a low-priced HAC phone, priced similar to the lowest cost non-HAC phone. ASTAC also offers a free HAC phone to customers subscribing to its wireless lifeline program. Annually, ASTAC informs its membership of the current HAC phone options in a presentation (in English and Inupiaq) delivered during the annual meetings in each of the villages.

Methodology for Functionality Levels

ASTAC offers HAC-compatible phones in all major categories. Basic Phones will have either no camera or a VGA camera. Basic Phones may be candy bar, slider or flip style. Basic Phones are capable of making and receiving calls,

sending and receiving text messages. WAP browsing and picture messaging may also be available on some models. Mid-Level Phones generally have higher resolution cameras and MP3 music players. They will have Bluetooth capability. Mid Level phones will usually have a memory slot for storing pictures, video and music. Mid Level phones also have the ability to send and receive both text and picture messages. Most Mid Level phones will have a WAP internet browser. High End Phones will have 2 Megapixel or better cameras. They generally have stereo Bluetooth capabilities, Most feature an additional HTML internet browser and larger, high resolution, displays. Some in this category have touch screens or slide out QWERTY keyboards. Smartphones have advanced operating systems like Symbian, Google Android, and Microsoft Windows Mobile which allow for application additions. These devices support both voice and data communications and generally are WiFi capable and feature rich.

Report Remarks

You have reported the following handset model summary information.

Total number of handsets offered: 43

Air Interface	Fully Hearing Aid Compatible		Acoustic Coupling Compatible Only		Non-Compliant Handsets		Excluded Handsets Number	Total by Air Interface
	Number	Percent	Number	Percent	Number	Percent		
GSM	16	37%	3	7%	24	56%		43
