During a short period of time, Claro misclassified this handset model as non-hearing aid-compatible. Believing that these handsets were not hearing aid-compatible, Claro did not market them as having a HAC rating and no rating was displayed on the packaging material. Nevertheless, the issue was promptly flagged and addressed. Specifically, Claro made arrangements with the manufacturer to ensure that all affected handset units located at its retail stores and warehouse are appropriately labeled with the HAC rating and that the packaging include an explanation of the HAC rating system before they are made available for sale to the public.
