Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency

band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations?
Yes

Explain:

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

N/A

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: www.gta.net

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: GTA's compliant handset models are publically identified for consumers and audiologists. Compliant models are listed on GTA's website. GTA trains all new and existing personnel who work in and with retail regarding which digital wireless phones are compliant. The compliant HAC phones are identified next to each unit via merchandising call out cards. Return polixies are in place for consumers seeking to obtain compliant phones.

Methodology for Functionality Levels

GTA developed its functionality levels based on the technical capabilities of the phones. Phones labeled advanced are considered smart/data phone and phones labeled basic are primary voice capable phones.

Report Remarks

The information provied in this report has been researched and accurate in presentation to the best of compilers knowledge.

You have reported the following handset model summary information.
