Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

Product Labeling

Do all hearing aid-compatible handsets include labeling? No

Explain: New, un-used handsets are delivered to customers in OEM packaging, HAC labeling as required by the rules, as well as the original manufacturer's user guide, which includes information regarding the handset's HAC rating and tips to avoid RF interference. Refurbished and used phones are not kitted in original manufacturer

packaging and therefore do not include HAC labeling. HAC information for refurbished, used, and/or reconditioned phones is provided on the Company's website.

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations?
No

Explain: New, un-used handsets are delivered to customers in OEM packaging, HAC labeling as required by the rules, as well as the original manufacturer's user guide, which includes information regarding the handset's HAC rating and tips to avoid RF interference. Refurbished and used phones are not kitted in original manufacturer packaging and therefore do not include HAC labeling. HAC information for refurbished, used, and/or reconditioned phones is provided on the Company's website.

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

N/A

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

N/A

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: sagetelecom.net

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: The Company engages in customer outreach and advertises the availability of its services throughout its service area using media of general distribution in a manner reasonably designed to reach those likely to subscribe to its service. In addition, the Company takes a hands on approach to customer outreach in that it engages local representatives in the community that hold neighborhood and community events educating consumers about its products and services. These local events afford consumers with an opportunity to ask questions and/or sign up for service. Our neighborhood outreach efforts are supplemented with a network of brick and mortar stores to which customers can return should they have questions or need assistance.

Methodology for Functionality Levels

Advanced: Complex Smartphone type operating systems e.g., Android, Apple, and RIM/Blackberry.

Middle: Voice capable messaging phones such as QWERTY keyboards, enhanced browsers such as those that support HTML and High Performance Push-To-Talk with high data speeds.

Basic: Feature phones that support text messaging where alphanumeric text entry may require triple tapping. Simple web-browsing capability and other data services are typically supported.
