### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: In 2015 Blue Wireless offered only HAC-rated handset

models. Blue Wireless works with hearing impaired customers in its retail stores to select a phone most suitable to their needs as well as works with training its retail staff regarding making HAC handsets available to hearing impaired customers or customers who may desire such models. Blue Wireless also lists its HAC handsets on its public website.

### Methodology for Functionality Levels

Blue Wireless offers handsets across different levels of functionality. Blue Wireless defines levels of functionality according to features and characteristics of the handset as well as cost. Handsets classified as Good include basic voice and texting functionality. Better handsets include voice/texting/mobile web browsing as well as picture cameras. Best handsets include smartphones that offer voice calling/texting/picture cameras/ web browsing as well as texting or touchscreen keyboards and Wi-Fi capability and/or MP3 players. Blue Wireless offers HAC compliant models in all of its functionality categories.
