

NOTICE OF CANCELLATION

In Reply Refer To:
PS&CID-001

FINAL WARNING: FAILURE TO RESPOND TO THIS LETTER WILL RESULT IN THE LOSS OF YOUR FCC LICENSE.

DO NOT DISCARD THIS CORRESPONDENCE. THIS LETTER REQUIRES A RESPONSE TO AVOID CANCELLATION OF THE RADIO STATION AUTHORIZATION(S) DESCRIBED HEREIN.

Dear Licensee:

The Federal Communications Commission's (FCC's) Wireless Telecommunications Bureau is completing an audit of the construction and operational status of certain Private Land Mobile Radio (PLMR) stations. This is the third letter sent concerning the status of your license. No valid response was received to the previous letters. **You will lose your authority to operate the listed stations if you do not respond to this inquiry within thirty days from the date of this letter.**

The audit includes PLMR stations licensed on frequencies below 512 MHz that are subject to frequency coordination and rule-based construction and operational requirements.¹ Licensing of a PLMR station would be required for operation of equipment such as, but not limited to, dispatch radios, mobile handheld radios or wireless headsets. The Commission's Part 90 Rules for the PLMR facilities require construction within a specified time frame and for stations to remain operational in order for the FCC license to remain valid. Specifically, when a licensee fails to construct its authorized PLMR facilities within the requisite construction period or discontinues operations for a period of one year, the license cancels automatically and the licensee is required to notify the Commission.²

We are writing this letter to inquire about the operational status (*e.g.*, whether a station is constructed and operating) of the PLMR stations for which you are licensed. For your convenience, the licensed call signs that are the subject of this inquiry are listed in an attachment to this letter. You are required to review the stations authorized under each call sign listed in the attachment and provide a truthful and accurate response using the appropriate column(s) on the attachment.³ Your response must indicate whether or not each station authorized under a call sign listed is constructed and operating in accordance with its current FCC authorization. In the case of a mobile-only license, your response must indicate whether or not the equipment was placed into operation and remains operational in accordance with its current FCC authorization. If all stations under a particular call sign are constructed and currently operating in accordance with the licensed parameters, then you indicate "Yes" in column 1A and no additional information on that call sign is required (*e.g.*, you do not have to complete columns 1B, 2 and 3 for that call sign). If a station under a particular call sign has not been constructed

¹ See 47 C.F.R. Sections 90.155, 90.157

² See 47 C.F.R. Section 90.157

³ See 47 U.S.C. 403; 47 C.F.R. Section 1.17

See Reverse

as authorized or has discontinued operation for more than one year, then you leave column 1A blank and put "No" in column 1B and write the word "Cancel" in column 2. If, however, you do not think that all of the stations authorized under the call sign should be canceled, then leave column 2 blank for that call sign and provide an explanation as to why the call sign should not be canceled. For example, the station may only have been recently authorized and the construction deadline has not expired. In addition, if you have sold your business to another entity who may be operating the equipment, provide information concerning the sale of the station or equipment rather than canceling the call sign. Each explanation must be in the form of a separate attached exhibit with the station(s) in question clearly identified and an exhibit number at the top of the page. If you are attaching an exhibit, indicate the exhibit number for the particular call sign in column 3.

An authorized employee of your company must certify to the accuracy of all responses by signing the form. If you are not sure what stations are licensed under a particular call sign or of the licensed parameters of a particular station you may find this information via the Internet using the Universal Licensing System (ULS) at <http://wireless.fcc.gov/uls>. Your response to this inquiry cannot be used to modify a station license. If a station authorized under a call sign on the attached list needs to be modified, you must file an application for station modification on FCC Form 601 through the appropriate frequency coordinator.⁴

You must respond to this letter within thirty days. Your response must be addressed to FCC, 2001 PLMR Audit Responses, 1270 Fairfield Road, Gettysburg, PA 17325-7245 and **must be received** at this location **no later than 30 days from the date of this letter.** Overnight courier and hand deliveries should be sent to FCC, 2001 PLMR Audit Responses, 1280 Fairfield Road, Gettysburg, PA 17325.

The Commission will presume from a failure to respond to this inquiry and previous inquiries that you either failed to construct the listed stations within the requisite construction period or that you discontinued operations of the listed stations for a period of one year. **Consequently, if you do not respond to this inquiry within the specified time frame noted above, the licenses for the listed stations will be deemed to have canceled automatically.** The Commission's licensing database will then be updated to reflect that you are no longer authorized to operate the listed stations. **You will receive no further correspondence regarding the listed stations.**

If you have any questions or need further information on this matter you may call 888-225-5322 and select option #2 or visit the WTB web site at <http://wireless.fcc.gov/plmrs/audit.html>.

FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average .50 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0979), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to Judith-B.Herman@fcc.gov. PLEASE DO NOT SEND COMPLETED LETTERS TO THIS ADDRESS.

Remember - You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0979.

THE FORGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.
