

# **UNIVERSAL LICENSING SYSTEM AUTOMATED TERMINATION AND ELECTRONIC FILING OF PLEADINGS**

January 24, 2006  
10:30 AM

Room 8-B516 of the Portals II Building  
445 Twelfth Street, SW  
Washington, DC 20554

## Agenda

- Introduction
- Purpose of the Public Forum
- Presentation Order
  - **Automated Termination: Overview and Demonstration**
    - Presenters:
      - Denise Walter, FCC Program Manager
      - Sonya White, Computech Analyst
  - **Pleadings: Overview and Demonstration**
    - Presenters:
      - Denise Walter, FCC Program Manager
      - Katie Frank, Computech Analyst
- Questions and Answers

## **Purpose of the Public Forum**

### **To Showcase Two New ULS Enhancements**

- An Automated Termination process in ULS that complements the construction / coverage requirements of most wireless radio services
- An Electronic Filing process for pleadings associated with ULS applications and licenses

## Automated Termination (Auto Term) Overview

- Auto Term is a process within ULS that identifies licenses, locations and frequencies that have passed their buildout deadline date without a timely-filed notice of construction (NT) or a request for an extension of time (EX)
- Absent a timely-filed NT or EX, ULS presumes the buildout requirements were not met and, as a result, the license, location or frequency automatically terminated under the Commission rules as of the expiration of the buildout requirement deadline

## Auto Term

### Background

- Rule Section 1.946 – addresses the filing of notifications and extension requests, provides that an authorization terminates automatically, without specific action from the Commission, for failure to meet the buildout requirements effective on the expiration of the buildout deadline date
- ULS R&O (1998) and MO&O (1999) - outlined a process to verify whether a licensee has met its buildout deadline and to update the licensing database (ULS)
- <http://wireless.fcc.gov/licensing/const-req/> - provides information on Auto Term such as Public Notices, the Declaratory Ruling, and Frequently Asked Questions as well as information on construction/coverage requirements by radio service

## Auto Term - Construction/Coverage Requirements

- Approximately 90 days before the buildout deadline, a construction/coverage reminder letter is sent to the licensee at the address listed on the license in ULS
- Be proactive – License Buildout Deadline Search
- A notice of construction must be filed ***NO LATER*** than 15 days after the buildout deadline, or
- A request to extend the deadline must be filed by the buildout deadline date

## Auto Term – Termination Pending

- Approximately 30 days after the buildout deadline, absent a notice of construction or an extension of time request:
  - Status of a license (auction), a location (cellular) or frequency (other services) changes to “Termination Pending”
  - License or license component is listed in one of two new “Termination Pending” Public Notices
  - Termination Pending Letter is sent to the licensee and its contact at the addresses listed on the license in ULS
- If the licensee met its buildout obligations but failed to notify the Bureau, the licensee has 30 days from the Termination Pending Public Notice to file a Petition for Reconsideration (PFR)

## Auto Term - Petition for Reconsideration (PFR)

### Buildout Obligations Were Timely Met:

- File a hard copy with the Secretary's office **or file electronically via ULS**
- Must be filed within 30 days of the Termination Pending Public Notice
- Must include the actual construction date, all call signs and the associated radio services, and, if filing by hard copy the name of the licensing division
- If the PFR is granted, ULS returns all affected statuses to active; otherwise the automatic termination is final
- No additional public notice is issued

## Auto Term – Termination Final

- Absent a timely-filed PFR, the license or license component are terminated as of the buildout deadline date
- For market-based licenses, ULS changes the status of the license to ‘Terminated’
- When the status of a location or frequency is changed to terminated, the component is removed from the license and ULS
- When the status of license components is changed to terminated, ULS uses a “roll-up” process. For example, if all frequencies at a location are terminated, the location is terminated
- Terminated licenses and license components are documented in the comment section under the Admin Tab in License Search
- No additional public notice is issued

## Clarification - Common Misunderstanding

### License Modifications In ULS

- When a license is modified (except additions), the old parameters are no longer reflected on the license nor are they retained in the license record
- If an authorized modification (except additions) is not constructed, the license must be modified to change back to the original parameters. The license does **NOT** automatically revert back to the previously authorized parameters under any circumstances
- Similarly, frequencies that have been deleted from a license by modification will **NOT** be added back to a license if the modification is not constructed

## Clarification - Common Misunderstanding

### Notifications Of Construction

(For services where build out deadlines are assigned at the frequency level; e.g. microwave, broadcast auxiliary and land mobile)

- Are required after grant of new licenses and license modifications that **ADD** frequencies
- Are **NOT** required for license modifications (including frequency changes) where the new parameters overwrote the old parameters of a previously authorized and constructed facility
- Are **NOT** required for modifications that only delete frequencies from a license

## Clarification - Common Misunderstanding

- A licensee may choose to **ADD** new frequencies to a license or apply for a new authorization with the new frequencies rather than modifying the existing license. Once the license has been authorized, constructed, and the notification provided, the old frequencies should be deleted or the old authorization canceled
- If a licensee fails to construct and place into operation a new facility or a modification to **ADD** new frequencies, the unconstructed frequencies enter the auto term process

## **Auto Term - ULS Features**

### **ULS DEMO Of New Features Supporting Auto Term:**

- On-line Filing
- Application Search
- License Search
- Auto Termination Pending Letter

## Auto Term Demonstration

### License Manager

- Market Based Licenses
- Frequency Based Licenses

## Log In

 [Help](#)

Log in to the License Manager to view and manage your licenses and applications, apply for a new license, and perform other license and application management tasks based on your FCC Registration Number (FRN). 10-digit FRN is required.

FCC Registration Number

Password

**SUBMIT**

- ▶ **Forgot your password?** [Contact Tech Support](#)
- ▶ **Need an FRN?** [Register with the FCC](#)
- ▶ **Not sure if you have an FRN?** [Check your licenses](#) to determine if they've been assigned an FRN
- ▶ **Are you a certified Land Mobile frequency coordinator?** [Log in](#) using your coordinator login and password

### About the FCC Registration Number (FRN)

An FRN is a 10-digit number that is assigned to a business or individual registering with the FCC. This unique FRN is used to identify the registrant's business dealings with the FCC. The FCC will use the FRN to determine if all of a registrant's fees have been paid. You are encouraged to register with the Commission as soon as you expect to do business with the FCC. This way, you will be ready to access any of the electronic licensing systems without having to go through the registration process at the time you submit an application.

The Wireless Telecommunications Bureau began requiring the FRN for the Universal Licensing System and Antenna Structure Registration on December 3, 2001.

For more information, see [Public Notice DA 01-2452](#).

### Don't See Your Licenses Here?

It's possible that your licenses have not been associated with your FRN. In order to manage a license using the License Manager, you must first [associate the license with your FRN](#).

### Re-associate Your Licenses With Another FRN

You may [re-associate all or some of these licenses with another FRN](#). Licenses may only be associated with one FRN, so by re-associating these licenses with another FRN, they will be disassociated from this FRN.

**NOTE:** You cannot use this function to update the FRN if the change is due to the sale (transfer of control) of the Call Sign(s) to another party.

### Disassociate Your Licenses From This FRN

You may also [disassociate all or some of these licenses from this FRN](#).

Logged In: ([Log Out](#))

**Renew Licenses**

[Quit Application](#) [Help](#)

**Select Licenses**

You have chosen to renew one or more licenses. During this process, you can renew licenses that are either eligible for renewal (no waiver required) or licenses that are not eligible for renewal (waiver required). Specify renewal eligibility status, select the licenses to renew, add them to the "Licenses to Renew" box, then click on the "Continue" button.

Which license eligibility status type do you want to renew?

- Eligible  Ineligible (Renewal Requires Waiver)

Licenses in termination pending status will not appear in this list. If a license is active but one or more components is in termination pending status, the term pending components will not be included on the application.

**Re-associate Your Licenses With Another FRN**

You may [re-associate all or some of these licenses with another FRN](#). Licenses may only be associated with one FRN, so by re-associating these licenses with another FRN, they will be disassociated from this FRN.

**NOTE:** You must not update the FRN if the change is due to the sale (transfer of control) of the Call Sign(s) to another party.

**Disassociate Your Licenses From This FRN**

You may also [disassociate all or some of these licenses from this FRN](#). Licenses may not be disassociated if they have expired or are otherwise no longer valid.

### Log In

[Help](#)

Log in to the License Manager to view and manage your licenses and applications, apply for a new license, and perform other license and application management tasks based on your FCC Registration Number (FRN). 10-digit FRN is required.

FCC Registration Number

Password

- ▶ **Forgot your password?** [Contact Tech Support](#)
- ▶ **Need an FRN?** [Register with the FCC](#)
- ▶ **Not sure if you have an FRN?** [Check your licenses](#) to determine if they've been assigned an FRN
- ▶ **Are you a certified Land Mobile frequency coordinator?** [Log in](#) using your coordinator login and password

#### About the FCC Registration Number (FRN)

An FRN is a 10-digit number that is assigned to a business or individual registering with the FCC. This unique FRN is used to identify the registrant's business dealings with the FCC. The FCC will use the FRN to determine if all of a registrant's fees have been paid. You are encouraged to register with the Commission as soon as you expect to do business with the FCC. This way, you will be ready to access any of the electronic licensing systems without having to go through the registration process at the time you submit an application.

The Wireless Telecommunications Bureau began requiring the FRN for the Universal Licensing System and Antenna Structure Registration on December 3, 2001.

For more information, see [Public Notice DA 01-2452](#).

02/01/2006 WPQN222: is in a termination pending status for failure to meet the buildout requirements.

This authorization is conditioned on the licensee notifying the Commission of each transmitter site located within 120 km (75 miles) of the U.S.-Mexican border. Specifically, for each site within the border area, the licensee must file an application to modify its license in order to add the new transmitter to this authorization within 30 days of commencing operation. Information on these facilities will be provided to the Mexican government in compliance with the Protocol Concerning Use of the 929-930 MHz and 931-932 MHz Bands for Paging Services Along the Common Border.

Date: 4/12/2006  
Reference Number: 2683586  
Radio Service YK  
Call Sign WPZV784

Re: EDIT 30473 – AM TO NE

The below-referenced license was granted authorizing the construction and operation of a new geographically based system; a new system for one or more new transmitter sites; or a modification to add one or more new transmitter sites to the existing license and/or add frequencies to one or more existing locations or microwave paths already authorized under the license. Granting this license imposed a construction or coverage requirement deadline on that system, location, and/or frequency. For more information on construction and coverage requirements, visit the Wireless Telecommunications Bureau website at <http://wireless.fcc.gov/licensing/const-req/>.

Our records indicate, however, that we have not received the Required Notification of Construction, due within 15 days after the construction or coverage requirement deadline, 47 C.F.R. § 1.946(d), or a Request for an Extension of Time, due before the expiration of the construction or coverage requirement deadline, *id.* 1.946(e), for this license. If a licensee does not file the Required Notification or Extension of Time request, we presume that the license or license component has not been constructed, or the coverage requirement has not been met. As a result, the Commission's Universal Licensing System (ULS) has placed the below-referenced license or license component in "Termination Pending" status. A Weekly Termination Pending Public Notice was recently issued listing the license in termination pending status. If the licensee met its construction or coverage requirement, it has 30 days from the date of the Public Notice to file a petition for reconsideration, as described more fully below, showing that it timely met the construction or coverage deadline. Grant of a timely petition will result in removal of the "Termination Pending" status and the license or license component will be returned to "Active" status. Once the 30-day reconsideration period has closed and if the licensee has not filed a petition for reconsideration showing that it timely met the construction or coverage requirement, the "Termination Pending" status in ULS will change to "Terminated," effective as of the construction or coverage requirement deadline on its license. The spectrum will then be available to the Commission for reassignment by competitive bidding or other means, according to the rules of the wireless service.

In filing its petition for reconsideration, the licensee must include the actual date when construction was completed or the coverage requirement was met. Petitions for Reconsideration may be filed electronically through ULS or by paper through the Office of the Secretary. To file electronically, visit the ULS web site at <http://wireless.fcc.gov/uls/>. Under "ULS Online Systems", click on "Submit a Pleading", complete the administrative information, and upload your Petition for Reconsideration. If filing by paper, the petition for reconsideration should state, on the first page: "To: Wireless Telecommunications Bureau, Mobility Division WPZV784 and YK." For further information on filing a petition for reconsideration, visit the Commission's website at <http://wireless.fcc.gov/rules.html> and select "Part 1 – Practice and Procedure." The rules for petitions for reconsideration can be found at Section 1.106, 47 C.F.R. § 1.106. For filing addresses, visit the Office of the Secretary's website at [www.fcc.gov/osec](http://www.fcc.gov/osec).

SEE REVERSE

FCC 672  
November 2005

For general information, visit the Commission's website at <http://www.fcc.gov> or call the FCC Support Center at (877) 480-3201, or TTY (202) 414-1255 and select Option #2. Support Center hours are from 8:00 a.m. to 7:00 p.m. Eastern Time, Monday through Friday (except Federal holidays). To provide quality service and to ensure security, all telephone calls are recorded.

exact matches only

[Advanced License Search](#)

#### Advanced Search

Want to search for licenses of any radio service code based on combinations of general license attributes?

[→ Advanced License Search](#)

Advanced License Search includes:

- ▶ Licensee State, ZIP, and Name
- ▶ Dates (Grant, Last Action, etc)
- ▶ License Status
- ▶ Radio Service Code
- ▶ And more.

#### Service Specific Search

Want to search for licenses within a service using criteria relevant to that specific service?

- [Aircraft](#)
- [Amateur](#)  
Vanity Call Signs, Operator Class, and more.
- [Commercial/Restricted Permits](#)  
Operator Class, COLEM, and more.
- [GMRS](#)
- [Ship](#)  
MMSI#, Ship Name, and more.

#### Specialized Search

Want to use customized criteria to search for a license within all relevant services?

- [Market Based](#)  
Search by auction number, markets, channel block and more.
- [Site Based](#)  
Search by station class, frequency, Antenna Structure Registration (ASR) number, and more.
- [Geographic](#)  
Search by coordinates, county/state, address and frequency information.
- [Buildout Deadline](#)  
Search by Buildout Deadline information, auction, radio services, and more.

## Electronic Filing of Pleadings Overview

- Automates the submission process for pleadings associated with ULS Licenses and Applications (WTB)
- Provides the filer with a confirmation page acknowledging receipt of pleading
- Provides immediate availability of the pleading document in ULS Application or License Search
- Decreases the amount of time for a pleading to be delivered to the licensing division

# Electronic Filing of Pleadings ULS Features

## Electronic Filing Demo

- Submit a pleading electronically
- Print out a confirmation page for record keeping
- View pleading attachments in Application and/or License Search

## Key Dates

- January 31, 2006
  - Electronic filing of pleadings
- February 1, 2006
  - The buildout deadline date for which the automated process begins
- March 8, 2006
  - First “potential” Termination Pending Public Notices published

## Questions and Answers

- Remote attendees may send an email to <http://esupport.fcc.gov/fccevents/reports/submitmsg.jsp> requesting to receive the Questions and Answers document when it is released. This Inbox will be available until January 27 at 5:00 pm.
- Please include your Name, Company, Address, and Telephone Number in your email
