

John Muleta
Chief, Wireless Telecommunications Bureau
Federal Communications Commission
445 12th Street, S.W.
Washington, DC 20554

Dear Mr. Muleta:

Pursuant to Section 27.607(b) of the Federal Communications Commission's ("FCC") Rules¹ and the *Memorandum Opinion and Order* granting authority to provide band management services in the 220-222 MHz band,² Access 220, LLC ("Access 220"), a wholly owned subsidiary of Access Spectrum, LLC, is pleased to provide this Annual Report on its progress in providing band management services utilizing its 220- 222 MHz licenses.

As of January 1, 2005, Access 220 has entered into six Spectrum Use Agreements ("SUA"), all of which are with unaffiliated entities. Two SUAs authorize the deployment of voice systems and have ten-year terms. Two other SUAs authorize the deployment of fixed data systems and have ten-year terms. The two remaining SUAs authorize the deployment of voice and data systems and have three-year terms. Access 220 has greater than 50 percent of its spectrum available under each of its 220 MHz licenses.

Neither Access 220 nor any affiliated entities use Access 220's licensed 220-222 MHz spectrum, although a few temporary operations have been conducted for prospective customers for system evaluation.

Access 220 continues to make progress towards its spectrum leasing business plans, consistent with its business objectives and FCC expectations. Due to our strong foundation of technical competency and equipment availability, we expect the pace of leasing to accelerate, and are actively negotiating with additional potential users of 220-222 MHz spectrum. Building on this foundation, Access 220 will continue to move forward to meet additional demand for 220-222 MHz spectrum. Please feel free to contact me if you have any questions.

Sincerely,

John F. Bruno

John F. Bruno
Vice-President, Finance
