

**700 MHz Guard Band Manager Report  
Harbor Wireless, LLC  
Second Annual Report  
February 28, 2003**

Pursuant to Section 27.607 of the Commission's Rules, Harbor Wireless, LLC, submits the following information as its first annual report:

1. Call sign and market area: WPRV425, Alaska MEA Block B
2. Total number of spectrum users: 0
3. Number of spectrum users that are affiliates of Guard Band Manager: 0
4. The amount of spectrum being used: 0
5. General nature of its customers' spectrum use: N/A
6. Length of Term of each user agreement: N/A

As of February 28, 2003, there were no users or operations in Harbor's licensed frequencies. Harbor has been working to identify potential applications and equipment suppliers for its Guard Band license as well as Lower 700 MHz licenses Harbor acquired in Auction #44. Among other issues Harbor has confronted, uncertainties regarding the transition framework for incumbent television broadcasters has caused delays among vendors in developing equipment for both public safety and commercial users in the 700 MHz band.

More significantly for the Guard Band, a spectrum swap proposal from Nextel, which holds the largest number of 700 MHz Guard Band licenses, has caused uncertainty over future use of all Guard Band licenses. Harbor has described its concerns regarding the Nextel proposal in detail in comments filed with the Commission on February 10, 2003 (WT Docket No. 02-55).

Harbor Wireless believes equipment vendors will commit to significant development efforts in the 700 MHz band only after these uncertainties are resolved. In the meantime, Harbor Wireless will continue to provide timely updates consistent with the reporting requirements.
