

ULS Public Access Release Notice

This revises previous version of this document, dated 8/21/07, by removing FCC ID from the F2 record type and revising the columns in the TP record type.

Effective Date: **September 9, 2007**

Description:

On September 9, 2007 ULS is implementing changes to the public access files to support the new ULS 3650 MHz NN radio service and its schedules. This results in additional columns being added to several record types along with the addition of a new record type.

- The Location record (LO) has 1 column that has been renamed.

Position	Data Element	Definition
14	Location County/Borough/Parish	varchar(60)

- The addition to the Location (LO) record type is as follows.

Position	Data Element	Definition
51	Earth Station Agreement	char(1)

- The addition to the Additional Frequency Information record (F2) record type is as follows.

Position	Data Element	Definition
20	Protocol Restricted or Unrestricted	char(1)

- A new record type (TP) has been added for Transmission or Protocol and columns are as follows.
