Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations?
N/A

Explain:

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

N/A

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

N/A

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: WWW.RRT.NET

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Availability of hearing aid capable handsets is mentioned in advertisements such as bill insert, newsletters, ads, mailing brochures. HAC information is also on our website and signage in showroom.

Methodology for Functionality Levels

We offer HAC-compatible handsets and devices in all major price categories, including low-cost ("C" level-\$100), moderate-cost ("B" level \$100-\$250), and high end ("A" level \$300 - \$500). Costs generally correlate with the number of features, but, if through experience, Red River Communications finds that a certain handset contains features that work well with hearing aids, such as volume control, it will be labeled accordingly with a "A" level for functionality. Red River Communications sales staff can assist existing and prospective customers looking for a HAC-compliant device/handset. HAC-compatible handsets and devices vary in their inherent "levels of functionality," but typically at least one (HAC-compliant handset/device with features and services typical of its price category) can be found that meets each customer's price range.
