Describe consumer outreach efforts in the past 12 months: Hearing Aid Compatibility information is available on our website. The information includes the ratings and educational HAC information. All of our retail locations provide the devices for customers to test. We educate our sales and CARE field about the basics of hearing aid compatibility and instruct them to support our customers by making devices available to customers to test for HAC to get the one that works best for them.

Methodology for Functionality Levels

Low end handsets are offered at low cost prices and are very affordable to prepay customers. These handsets have basic call functionality and text messaging capabilities.

Mid level handsets come with features for personalization such as ringtones, picture messaging, and mobile web.

High level handsets offer faster data speeds such as EVDO, video capture capabilities and music, among other features.

Smart level devices provide access to email, full QWERTY keyboard, along with an advanced operating system with the ability to install applications.
