## Hearing Aid Compatibility Status Report (FCC Form 655)

Reporting Period: January 1, 2015 - December 31, 2015

Filing Confirmation Number: 0007091949

Filing Deadline: January 15, 2016

FRN: 0003936168

Filing Date: 01/11/2016 02:47 PM

### General Report Information

#### Type of Company

Service Provider

#### De Minimis Exception

Did you offer any handsets to subscribers in the United States during the reporting period? Yes

Have you been offering handsets in the United States for at least three years prior to the end of the reporting period? Yes

Date that you began offering handsets in the United States

Are you a small entity? Yes

Were you a small entity at any time during the three years prior to the end of the reporting period?

Date that you ceased to be a small entity?

### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that were tested under ANSI C63.19-2007, and that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007, include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operation?

Yes

Explain:

Do all hearing aid-compatible handsets that were certified only under ANSI C63.19-2007, but that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

Yes

Website address: <http://cellular1.net/hac.asp>

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company web site, and retail sales personnel are trained to assist with compliant digital wireless phones. Compliant handsets are available for testing in retail locations. Written materials and promotional literature are provided at the point of sale and on the website, addressing the needs of individuals with hearing disabilities. Such consumers are given a thirty day trial period within which to try out digital wireless phones to determine whether they will work properly with their hearing aids.

### Methodology for Functionality Levels

Low Tier Phones offer basic wireless telephone features, may not have a camera, Bluetooth, or Internet access

capability, and generally lack such features as MP3 players and expandable memory. The designs are typically bar or flip for customers using voice or text only.

Mid Tier Phones may have a camera, Bluetooth or Internet capability, but are less likely to offer video/music/media player capability. The designs are less stylish and tend to be clamshells or flips.

High Tier Phones have more extensive features, such as Bluetooth, Internet access capabilities, increased storage or expandable memory, high-resolution color display, enhanced camera or video capabilities, and music or MP3 player functionality. The designs are more modern and sleek.

PDA and Smartphones typically have QWERTY or touch keypads and go beyond just making phone calls to including operating systems that allow the phone to run productivity applications and have software that may enable you to create and edit Microsoft Office documents or at least view them, download applications, edit photos, access the web, and more.

## Report Remarks

Cellular One of East Central Illinois does not operate network facilities utilizing AWS, 700 MHz, , WiFi, WiMax, LTE or CDMA air interfaces.

You have reported the following handset model summary information.

Total number of handsets offered: 38
