## Hearing Aid Compatibility Status Report (FCC Form 655)

Reporting Period: January 1, 2015 - December 31, 2015

Filing Confirmation Number: 0007096304

Filing Deadline: January 15, 2016

FRN: 0001568302

Filing Date: 01/14/2016 11:06 AM

### General Report Information

#### Type of Company

Service Provider

#### De Minimis Exception

Did you offer any handsets to subscribers in the United States during the reporting period? Yes

Have you been offering handsets in the United States for at least three years prior to the end of the reporting period? Yes

Date that you began offering handsets in the United States

Are you a small entity? Yes

Were you a small entity at any time during the three years prior to the end of the reporting period?

Date that you ceased to be a small entity?

### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that were tested under ANSI C63.19-2007, and that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007, include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operation?

Yes

Explain:

Do all hearing aid-compatible handsets that were certified only under ANSI C63.19-2007, but that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

N/A

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Service provider websites must include the levels of functionality that the service provider has defined, the level that each hearing aid-compatible model falls under, and an explanation of how the functionality of the handsets varies at the different levels.

Yes

Website address: <http://www.cvinternet.net/Pages/Wireless/WirelessHearingAidAccessibility.php>

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: The Company has instructed its sales staff about the availability of hearing-aid compatible phone models and it has signs in each store advertising the availability of HAC devices. The Company's sales staff is aware of the HAC-compliant issue and has been trained to respond to customer inquiries regarding HAC phones. The Company also has wireless industry pamphlets available that customers can take home regarding information about the Commission's HAC requirements and HAC rating system. In addition, both hearing impaired and non-hearing impaired customers are permitted to test phones in retail stores. Furthermore, the Company has a policy which allows customers (whether hearing-impaired or not) to test the

handsets and service without commitment for up to 30 days. If the customer is not satisfied, he or she may return the handset without charge (assuming it has not been damaged) at the end of a two-week trial period.

### Methodology for Functionality Levels

To make our categories more understandable and contemporary, the Company has combined its previous "basic phones" and "feature phones" categories into a single category of "standard handsets." The Company has combined handset categories in this manner because in today's marketplace, there is little difference any longer between "basic" and "feature." All of these types of phones now have text, mms, camera, and Bluetooth functionality. The main difference today between handsets in this segment is the style/shape of the phone (flip, slider, bar) which are easily identifiable by the prospective user.

### Report Remarks

You have reported the following handset model summary information.

Total number of handsets offered: 33

Air Interface	Fully Hearing Aid Compatible		Acoustic Coupling Compatible Only		Non-Compliant Handsets		Total by Air Interface
	Number	Percent	Number	Percent	Number	Percent	
CDMA	28	85%	5	15%			33
LTE	15	94%	1	6%			16
Wi-Fi	19	79%	5	21%			24
